

Vegetation Management Services

A VOVE
UTILITIES
MOVING LIFE FORWARD

Keep the lights on 24/7 with AvoVe's unique end-to-end vegetation management service

We deliver expert-led vegetation management to regulated utility organisations across the UK.

Vegetation management is an essential process required to ensure that power operations are not obstructed by trees or overgrown vegetation and that electricity is supplied safely and efficiently to homes and businesses.

Our unique service helps you manage risk, meet compliance targets and keep the lights on for customers and communities.

We are a responsible organisation, committed to creating a sustainable future and making a positive impact, socially, economically and environmentally in the communities where we work and live.

An all-encompassing service

AvoVe's end-to-end service is unique in the UK market. Partner with us and we'll handle it all – from surveying to outage project management to tree surgery.

For you, this means a simpler, more efficient way of working. With one trusted partner on board, you'll unlock time and cost savings, keeping communication, trust and transparency front of mind. Plus, you'll have a team of experts and fully qualified arborists on hand, whenever you need them.

We have the expertise and equipment to handle any job of any size and scale. You can rely on us for all aspects of vegetation management along overhead power lines, from low-voltage lines to 132 kV high-voltage lines.

- > **End-to-end management**
Trust AvoVe to tick all the boxes, from tackling outages to liaising with landowners and stakeholders.
- > **Planning and surveying**
Expect accuracy and safety as standard. We're here to help you get the job done first time and be ready for future risks.
- > **24/7 emergency support**
Enjoy 24/7 support, 365 days a year. Our teams work around the clock to keep your customers connected.
- > **Expert arborists**
Get instant access to more than 300 qualified personnel. Our team includes authorised and senior authorised persons, as well as arborists, planners, surveyors and more.

Our expertise

- > **Storm resilience planning**
Safeguard critical circuits with proactive planning. Our professional tree inspectors recommend plans for dead, dying and dangerous trees in line with ETR 132 best practices.
- > **Ash dieback management**
Get a head start on risk management. We review and manage ash trees as standard within our planning and surveying procedures.
- > **Major incident management**
When things go wrong, we're on hand to protect vulnerable people and your reputation. Expect a fast response and a comprehensive fault management plan.

Vegetation services

- Felling, pruning and crown reduction
- Dealing with dead and dying trees
- Emergency storm response
- ESQCR 43.8 maintenance surveys
- Retained tree surveys and management
- Wayleaves and consent
- Third-party outage works
- Mechanised tree clearance
- Railway vegetation management
- Tree clearance on overhead lines
- Invasive species control, including Japanese knotweed
- Site and access clearance
- Vegetation and ecological surveys

Our approach

We are an expert, responsible and agile partner, providing vital services and sustainable solutions to the UK's leading utility networks. Here are some of the reasons why:

> **We put safety first**

When you choose Avoe, you can rest assured that your people, your property and the public are in safe hands. We're proud of our impeccable safety record and have achieved the RoSPA President's Award in recognition of our robust risk control strategies.

> **We grow expertise**

Our clients are true partners. We invest in our expertise because we recognise that our success is your success.

Our arborists fully meet the requirements of distribution network operators and industry bodies and hold specialist qualifications from City & Guilds Land Based Services (formerly NPTC).

> **We move life forward**

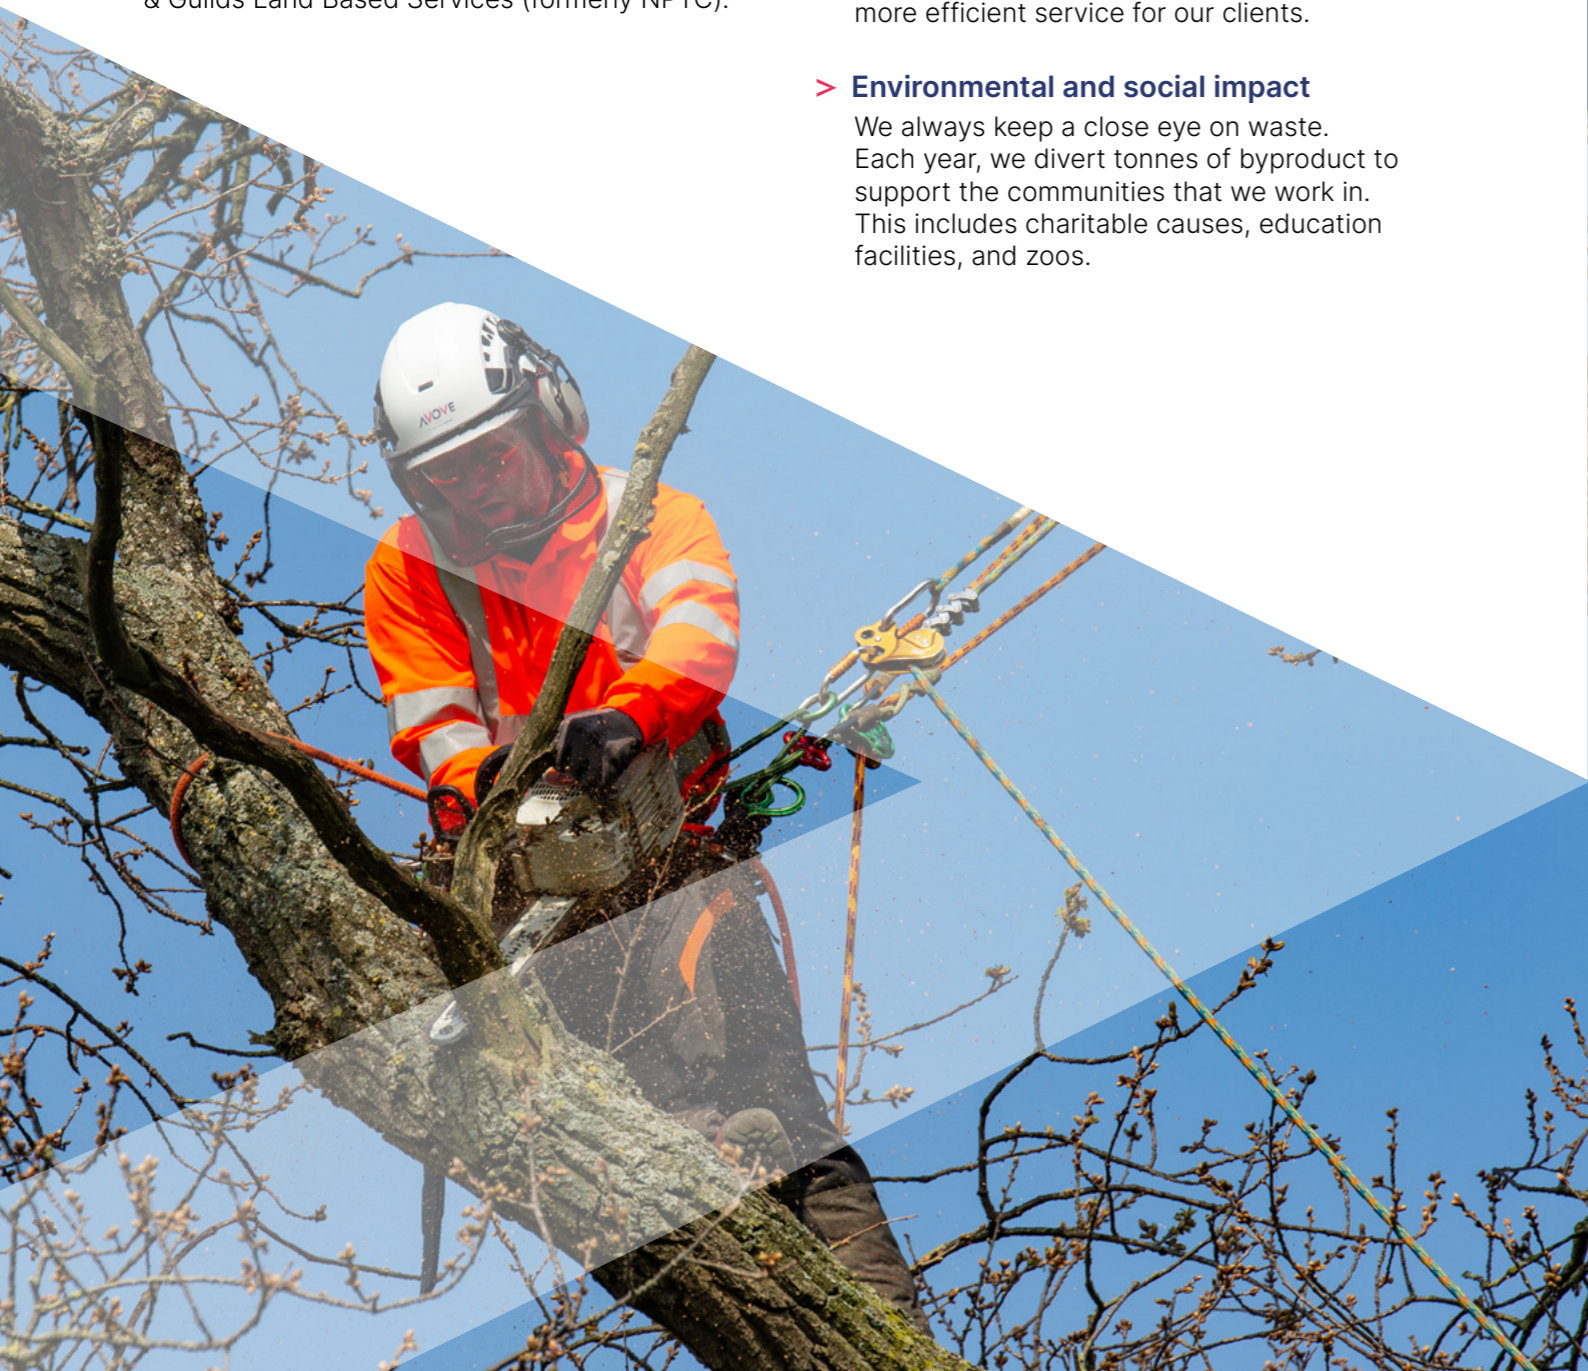

We embrace the future and we're passionate about positive change. That's why we're constantly improving the way we work and the services we provide to you.

This means working with clients to prevent outages through inventive solutions. It means investing in training and apprenticeship initiatives to build on our expertise and nurture new talent. And it means developing our operational procedures to allow for more innovative pruning methods.

We've also developed a bespoke paperless management system. Built in-house by our experts, it helps us deliver a faster, greener and more efficient service for our clients.

> **Environmental and social impact**

We always keep a close eye on waste. Each year, we divert tonnes of byproduct to support the communities that we work in. This includes charitable causes, education facilities, and zoos.

“ Thank you to everyone for the hard work and professionalism. This project was dealt with and delivered very well, massively improving the network and removing risk.

James Makin
Programme Manager at Northern Powergrid
